## Episode One + Two MAG GUIDE

### First Page Key:

**Mag**- Name of the Mag (Italicized Names mean that every Section ID can get it; you just need to be the right class.)

**Charged**- The Mag's effect should you fill its Photon Blast Bar.

**Boss Fight**- The Mag's effect when you enter a boss fight.

**1/10 HP**- The Mag's effect should you be in a situation where you're down to your last 1/10<sup>th</sup> of your entire HP.

**Revival**- The ability that your Mag can revive you or not.

**Photon Blast**- The Photon Blast you'll receive when you reach that evolution of Mag.

**Class**- The class that can raise the Mag.

**Evolution**- The first, second, or third (final) stage of your Mag's evolution. Simply rearrange the Mag's stats during the third evolution to get a different Mag.

**Requirement**- The order in which the Mag's stats must be at to reach that evolution. For example: POW>MIND>DEX means POW must be the highest stat, then MIND must be the second highest (middle) stat, and DEX is the lowest stat.

**Prefs**- The Mag food chart you should look at on page 2 of the guide.

**Type A IDs:** Purplenum, Redria, Skyly, Viridia, Yellowboze

**Type B IDs:** Bluefull, Greennill, Oran, Pinkal, Whitill

### Gamecube Mag Key:

**Gender**- The Gender that must get the Mag to its proper evolution.

**Evolution**- Always at Level 100 of a Mag.

**Requirement**- Stat requirement. Example: DEF+DEX = POW+MIND means DEF and DEX must equal POW and MIND. You can have 25 DEF, 25 DEX, 25 POW, and 25 MIND, for example. Or 35 DEF, 15 POW, 50 MIND, and 0 DEX.

**Prefs**- The Mag food chart you should at on page 3 of the guide.

### Second Page Key:

**Prefs #-** The number of the food chart you must match to the Prefs column on the first page.

**DEF, POW, DEX, MIND, IQ, SNC**- The stats on a Mag. SNC means SYNC, if you haven't figured it out.

**Monomate, Dimate, etc.**- The foods for Mags. Look to their appropriate row to see how it'll affect each stat. Red numbers are obviously stat decreases.

### Third Page Key:

The Food charts pretty much work the same way, with the exception that the names of the Mags that match the chart are on the right side of the chart since it doesn't take up a lot of space.

*Cell Chart (Will be updated):*

**Kits/Hearts/etc.:** The Kit or Heart being used.

**Mag to Use:** The Mag to use with the Kit/Heart plus what level it should be at (or higher).

**Result:** The result of using the correct Heart/Kit/whatever on the correct Mag.
